Professional Summary

DevOps Engineer with nearly 2 years of industry experience managing and supporting high-traffic SMS Firewall platforms across 10+ telecom operator environments, including production, testbed, and disaster recovery systems. Skilled in Linux administration, System monitoring, Software deployments, Application development, and Root cause analysis. Passionate about automation and system reliability, with strong problem-solving abilities, teamwork skills, and a commitment to continuous learning. Outside work, I enjoy listening to music.

Work Experience

Associate DevOps Engineer, Omobio (Pvt) Ltd — Jun 2025 - Present

- Installing SMS Firewall product in Red Hat Linux environments using Docker and Podman.
- Provided L1/L2/L3 operational and implementation support for production systems, resolving incidents and maintaining service availability in production environments.
- Monitored production systems using Nagios to identify issues and ensure system availability.
- Performed new release deployments and production updates using XFTP.
- Contributed to application development using PHP and Ext JS by implementing new change requests (CRs) and fixing bugs.
- Performing disaster recovery activities across production environments.

Trainee DevOps Engineer, Omobio (Pvt) Ltd — Dec 2024 - Jun 2025

- Installed and configured telecom products in Red Hat Linux environments.
- Containerized applications using Docker and Podman.
- Assisted in troubleshooting live application issues in production environments.
- Monitored system health and service availability using Nagios.
- Communicated with senior engineers and regional teams to maintain service availability in 24/7 production environments.

Technical Skills

Operating Systems: `Linux`, Windows
DevOps & CI/CD: `Docker`, `Podman`, `Git/GitHub`, Bash, Kubernetes, GitHub Actions
Cloud: `AWS`, Microsoft Azure, Oracle Cloud Infrastructure
Languages & Frameworks: `PHP`, `React JS`, Python
Databases: `MySQL`, `MariaDB`, MongoDB
Monitoring: Nagios, Grafana with Prometheus
Others: `MS Office 365`, `Networking Fundamentals`

Projects

EMvidence-NG - University Research — 2026

- Developed an API-first BaaS platform using Emvidence-NG to address limitations in existing digital forensic tools, including high CPU and memory consumption, I/O bottlenecks, and the lack of parallel processing in monolithic architectures.
- Technologies: Python, Bash, Docker, Grafana, Prometheus
- Contributions: Installed EMvidence (Legacy system) and Evaluated throughput, Excution Time, Ingestion Rate, Setup Grafana for Emvidence-NG, Documentation using Latex
- Source Code: Github

CI/CD Pipeline Deployment Project 2025

- Designed and implemented a full CI/CD pipeline for deploying a Dockerized Python web application to Oracle ECS using GitHub Actions.
- Technologies: GitHub Actions, Docker, Oracle Cloud Infrastructure (OCI)
- Contributions: Enhanced CI/CD pipeline, improving container build and deployment efficiency.
- Source Code: Github

Roi-Innovators Web Application 2024

- Developing a digital services platform with contributing to requirement analysis, development and automated deployment using Vercel.
- Technologies: Next.js, Tailwind CSS, EmailJS, Vercel
- Contributions: End-to-end development, deployment, and hosting of applications on Vercel.
- Source Code: Github

INpower Laptops Web Application 2024

- Developing a platform for laptop reparing company with contributing to requirement analysis, development and automated deployment using GitHub Actions.
- Technologies: Github Action, Next JS, EmailJS
- Contributions: End-to-end development, deployment, and hosting of applications on Github Pages.
- Source Code: Github

University Projects 2024

- `Aetha` - As our third-year group project, we developed a solution for publishing digital contents
  Source Code: Github
- `MedsupplyX` - As our second-year group project, we developed a Medicine Procurement and Inventory Management Platform with that streamlines ordering, stock tracking, and supplier management for medical stores.
  Source Code: Github

Education

University of Colombo School of Computing, Sri Lanka 2022 - 2026
B.Sc. (Hons) in Information Systems - Second Upper

Dharmapala Vidyalaya Pannipitiya, Sri Lanka 2007 - 2020
G.C.E. Advanced Level: Z-score: 2.01

Achievements and Volunteering

AWS Cloud Practitioner Essentials 2026
AWS Skill Builder Credential

LFS101: Introduction to Linux 2025
Linux Foundations - Credential

OCI Certified Foundations Associate 2025
Oracle - Credential

Editor - Executive Committee 2024
Rotaract Club of UCSC
